Self-taught software developer and quality engineer with 6 years of expertise in JavaScript and PHP. Adept at producing reliable code and ensuring exceptional software quality.

WORK EXPERIENCE

Ceros - Full Stack Software Engineer   New York (Remote)
February 2022 - April 2023
October 2018 - February 2020

- Collaborated on microservices, contributing to features benefiting 600+ B2B clients.
- Led Weekly and Monthly Product Deployments, optimizing deployment pipelines.
- Developed backend functionality, implemented feature flags, and established API integrations for external services across 5 long-running epics.
- Assumed the role of Product Superfriend, addressing customer support issues directly.

Ceros - Quality Engineer   New York (Remote)
February 2020 - February 2022

- Led manual testing and communication for a revamped product by an external contracting team.
- Successfully wrote and migrated over 200 e2e tests from Protractor JS to Webdriver IO + Cucumber, reducing manual testing time.
- Orchestrated Jenkins jobs for CI/CD e2e test framework and integrated e2e test reporting via Report Portal.
- Rewrote e2e tests to reduce test running time from over 35 minutes to less than 15 minutes.
- Documented tests using TestRail and Cucumber scenarios.

Andela - Full Stack Software Engineer   Nairobi, Kenya (Hybrid)
June 2017 - October 2018

- Contributed to an internal learning management product (Angular, Laravel), enhancing user experiences.
- Conducted interviews and boot camps, facilitating onboarding of new developers.
- Provided orientation and mentoring for developers joining product teams.
